Whether you are a private real estate owner/developer or a public real estate investment trust (REIT), you need flexible access to capital to finance large, complex projects and take advantage of emerging opportunities in the commercial real estate market. A syndicated loan is often the answer.

PNC is positioned to provide and help you raise debt capital within the loan market. Our knowledgeable team delivers comprehensive solutions so you can get the financing you need, when you need it, without managing multiple lending relationships.

Our professionals bring a broad and deep background in the real estate operating and finance businesses to every deal we do. We believe that understanding your business is key to delivering an effective and competitive financial package for you.

SECONDARY LOAN TRADING

In the sophisticated loan market, primary sales of new loans must be coupled with a viable secondary loan trading business. Whether it is establishing current pricing levels for your facility or supporting an orderly management of investments into or out of a syndicated financing, PNC's secondary loan trading desk can be a helpful resource.

AGENCY SERVICES

PNC provides knowledgeable servicing of its syndicated loan portfolio through the activities of our Agency Services group. This group ensures that interest and fee payments, construction loan disbursements and draws under revolving credit facilities are processed efficiently. Agency Services also works to enable the timely dissemination of company and transaction-specific reporting to your lender group. With approximately \$167 billion in commitments and 550 total clients managed across corporate, institutional, asset-backed and real estate lending businesses,¹ Agency Services is a

critical part of our ongoing client relationships and a key component of our full-service loan syndication business.

EXPERIENCE IN REIT FINANCING

PNC offers broad and deep experience in REIT financing and maintains a significant portfolio in this segment with more than 100 clients and more than \$15 billion in exposure.² This exposure comprises a variety of financing types from corporate term loans and revolving credit facilities to construction loans and investment fund financings.
