

*Dear Family,*

In my class today, I explored moving like an airplane and a boat.

**Did You Know?**

- Vehicles use movement to get people from place to place.
- Children can express themselves through movement.
- Movement activities help children by improving alertness, attention, and motivation.

**Ask Your Child:**

- Explain how an airplane moves differently from a boat.
- Describe how you moved like an airplane.
- Describe how you moved like a boat.

**Activities To Do With Your Child:**

- Gather some old magazines or newspapers, and help your child cut out pictures of different vehicles. Discuss the different ways the vehicles move. Have your child choose and cut out a picture of their favorite vehicle. Tape or glue it to a sheet of paper, or allow them draw it on a sheet of paper. Send it to school to share with us.

**Vocabulary To Use With Your Child:**

- **movement** – a way of changing position or place.
- **vehicle** – a thing used to carry and move people or things.
- **boat** – an open vehicle that moves on water.
- **airplane** – a machine with wings that can fly.
- **take-off** – the act of leaving the ground in preparation for flight.
- **row** – using oars to move a boat forward.
