

Dear Family: In class today, we observed nature. In our journals, we drew the plants and animals that we saw.

Did you know?

- Nature is all around us.
- There are lots of living things in nature.
- We can explore and learn from nature.

Ask your child:

- Tell me what you saw in nature.
- Describe the things you drew in your journal.
- Explain where you saw these things.

Vocabulary:

- nature – the natural world.
- scientist – a person who works in science.
- journal – a book for writing.
- record – to write.
- observation – a careful look at something.
- change – to make different.

Activity:

Take a walk outside with your child. Help your child notice all the things in nature. Discuss all the beautiful things you saw. Help your child to draw one thing that is different from what they saw at school. Help your child to label it. Send it to school to share with us.
