

# Cambridge Associates Indices

Cambridge Associates LLC U.S. Private Equity Index

The Cambridge Associates LLC U.S. Private Equity Index is a horizon calculation based on data compiled from 1,468 U.S. private equity funds (buyout, growth equity, private equity energy and subordinated capital funds), including fully liquidated partnerships, formed between 1986 and 2017. Private indexes are pooled horizon internal rate of return (IRR) calculations, net of fees, expenses, and carried interest. The timing and magnitude of fund cash flows are integral to the IRR performance calculation.
