PNC Recruits on College Campuses Offering Real World Experiences: Summer Internships and Development Programs

The future of our workforce depends on promising young professionals. Emerging talent is graduating every year. At PNC, we offer summer internships and early career development programs to help grow that talent into tomorrow's workforce.

As a PNC Intern, students will participate in a "best-in-class" internship program. During this 10-week program, they will have the opportunity to gain exposure to a specific line of business, expand the tools they need to launch their career and complement their education with real-world job experience. PNC interns participate in the Venture Vault (think TV's Shark Tank) where students pitch a ground-breaking solution for a business challenge to senior leaders and executives.

Our Development Programs vary in length and location, depending on the line of business. Programs range between 12 and 36 months. The experience includes formal onboarding, peer mentors and the opportunity to work side by side with PNC professionals.

From real-world experiences to project-based assignments, our Summer Internships and Development Programs give students and recent graduates the exposure, opportunity and support they need to develop and grow - as a person, as well as a professional. With numerous business areas that suit a variety of skills and interests, we offer plenty of opportunities to start a rewarding career.

PNC Eliminates Non-Sufficient Fund Fees for Consumer Banking Customers

Students face enough expenses attending college without having to worry about paying bank overdraft fees. According to a study by NerdWallet, the average college student goes into an overdraft situation more frequently than the average consumer. Research shows that young, inexperienced consumers and those with lower incomes are the most at risk for overdraft fees.

To continue helping customers navigate [Low Cash Mode[®]](#), PNC no longer charges consumer deposit account customers, including [Virtual Wallet Student](#) account holders, NSF fees.

Highlights

- As of August 6, 2022 PNC no longer charges non-sufficient fund (NSF) fees to consumer checking account customers.
- Eliminating NSF fees is yet another way PNC is helping customers strengthen their financial wellness.
- This comes a year after PNC launched Low Cash Mode, which provides options for avoiding potential overdraft fees.
