

Title: Express Funds – Full Video

PNC Employee: Dominic

Transcript: Hi, my name's Dominic. I'm a digital product manager on the PNC Mobile team.

Today, I'd like to talk to you about the PNC Express Funds feature in the PNC Mobile App.

PNC Express Funds is an optional service that may provide you with instant access to your money.

Today I'm going to show you how to use PNC Express Funds on your mobile device while making a mobile deposit. If your check qualifies, PNC Express Funds is offered to you during the deposit. The fee for this is 2% or \$2. This fee provides you immediate access to your funds to buy gas, go to the grocery store, grab some takeout.

There is a great peace of mind that comes with PNC Express Funds. It's knowing that if the check is returned for insufficient funds, your account will not be charged.

I hope that this really helped you understand what PNC Express Funds is and how you can use it to have immediate access to the funds that you're depositing using the PNC Mobile application.
